THE CONTEMPORARY RANGE

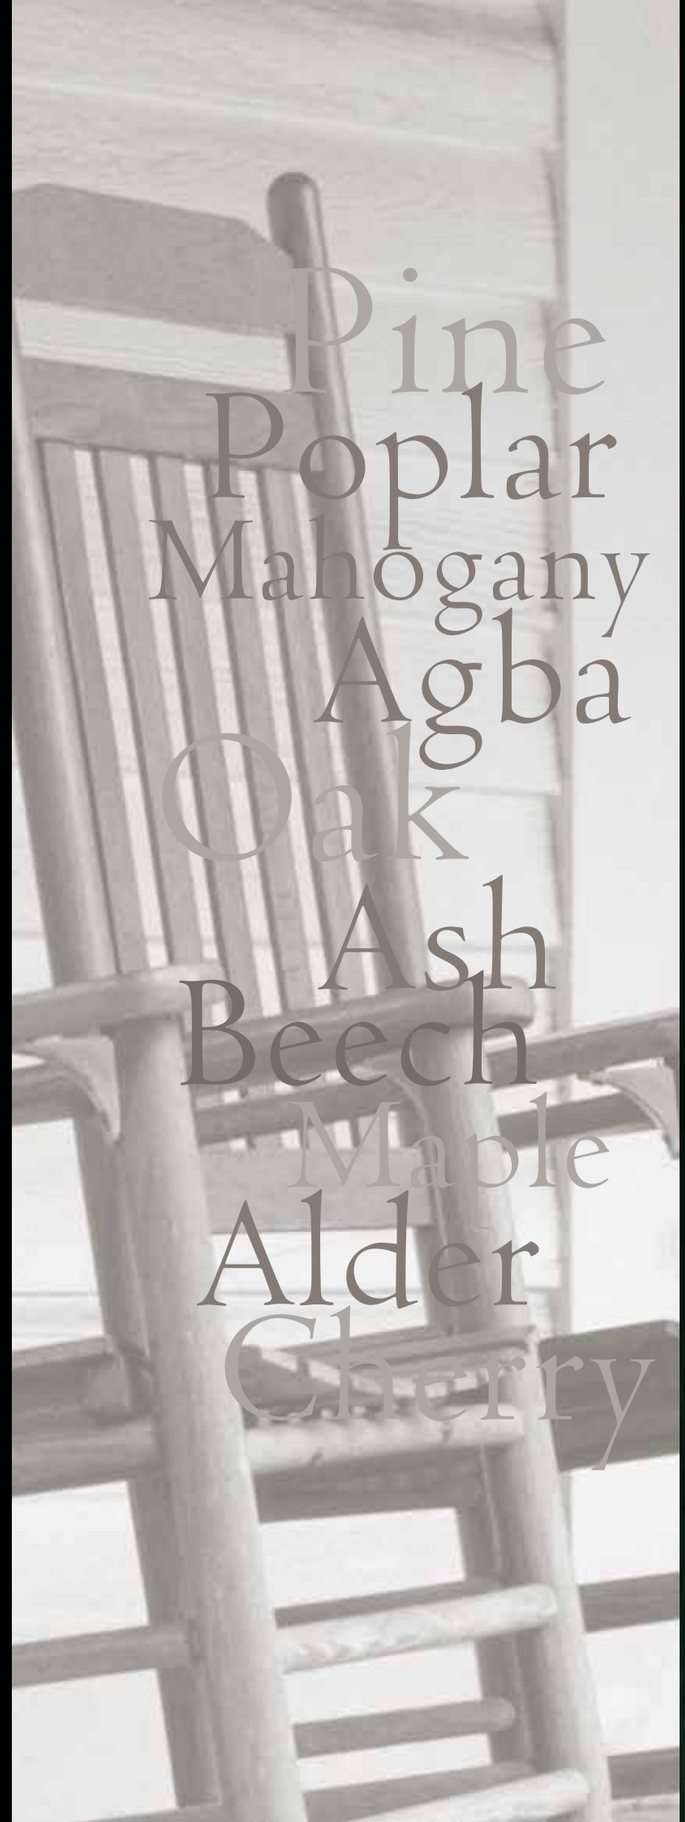
Classic MANTELS

Some completely original designs and some borrowing ideas from design classics, we have called this collection;

The Contemporary Range.

All available as standard designs, we are also able to produce customised variations of any mantels in the collection. From a simple variation with an alternative finish, whether stain or painted, to additional decoration.
Or you can let us have your own design for a complete custom build.

Classic MANTELS



By manufacturing each mantel to order using a variety of solid timbers, Classic Mantels offer the widest choice to every customer. Whether you choose from our wide range of standard stain colours, a natural finish, or prefer us to colour match to your existing furniture, each mantel is hand finished to accentuate the natural grain and markings in the timber. Alternatively you may wish to harmonise your interior scheme by choosing our hand painted eggshell finish which we offer on any currently available paint chart or BS reference.
While the featured contemporary range in general is less ornate, our experienced craftsmen can vary the decoration by adding carving, marble or marquetry inlays or changing the sizes to suit your personal specification. Please contact us if you have any specific requirements.

all types of finish from stain or paint..

..or more decorative

The striking lines of this classically styled mantel owes much to Charles Rennie Mackintosh, whose designs still exert a significant influence on modern contemporary styling today.

RENNIE

The more minimal lines that became a characteristic of the deco period shocked and changed the face of interior styling. But today these designs are regarded as some of the most timeless, creating a dramatic focal point in modern home interiors.

Slightly more traditional in feel, but with its roots definitely in the twentieth century, the Cole harks to an era of very stylish yet solidly designed furniture, built to last by craftsman carpenters.

Only the finest quality timbers are used in the manufacture of our mantels which are sold subject to the natural markings and variation in grain pattern forming the character of the timber. Whilst every care is taken in selection, mantels supplied untreated or with a natural finish may be particularly subject to colour variation.

All of our timbers are kiln dried and therefore contact with even the minimum of moisture may lead to movement. Timber mantels should never be installed against a newly plastered wall. Most timbers, especially cherry, will mature in colour over a short period of time. This is a natural occurrence dependent on exposure to natural light.

We are committed to continuous development and improvements to our products and therefore reserve the right to alter specifications without prior notice. The colour and shade reproduction in this brochure is as accurate as the printing process allows and should not be used as an accurate guide.

By prior appointment visitors are welcome to see our production process, timbers used and the quality of our finished goods.
